

Green Clipper Sport

 Mowing Solutions®

 Green Clipper®
mowing solutions

The Green Clipper Sport was developed for mowing sports fields and other frequently maintained large areas of lawn.

The cutting area consists of four fully independent suspended mowing decks, each with a width of one meter.

The energy for the electric motors is supplied by a compact generator on the back of the tractor.

On level terrain the Green Clipper Sport can achieve high working speeds without affecting the mowing quality.

Grass clippings are nice and evenly dispersed even in very wet conditions. These properties cause that the Green Clipper Sport can be used, just like the rest of the Green Clipper family, almost independent from weather conditions.

The solid construction and a minimum of moving parts make sure the Green Clipper Sport requires low maintenance.

Specifications

Capacity:	8 ha/h
Working speed:	Up to 25 km/h
Height adjustment:	15 – 80 mm
Required tractor power:	Min. 37 kW
Mass front-unit:	520 kg
Mass back-unit:	270 kg
Number of decks:	4
Mowing deck:	Flex deck
Cutting width:	4,1 m
Transport width:	2,4 m
